

World Soil Day celebration with an open field trip of the course „Soils of Hungary” Hungarian University of Agriculture and Life Sciences 5. December 2022.

The course „Soils of Hungary” celebrates the World Soil Day with a field trip to the Mátra mountain. Colleagues of the Soil Science Department and students will visit soil profiles of the forested area (Mátraháza) and a floating moss peat (Nyírjes-tó) and walk around the small parasite volcano of Verpelét. We complete the day with the protected periglacial soil formation of Atkár. The field trip is open to join. We start 8.15. The route: <https://goo.gl/maps/yxJ5jLS3rKYU9yNd6>
